**145545 Wensayling (2006 KA39)**

**Classification:** Outer Main-belt Asteroid  
**SPK-ID:** 214554

**Orbit Diagram**

*Note:* Make sure you have Java enabled on your browser to see the applet. This applet is provided as a 3D orbit visualization tool. The applet was implemented using 2-body methods, and hence should not be used for determining accurate long-term trajectories (over several years or decades) or planetary encounter circumstances. For accurate long-term ephemerides, please instead use our Horizons system.

Additional Notes: the orbits shown in the applet are color coded. The planets are white lines, and the asteroid/comet is a blue line. The bright white line indicates the portion of the orbit that is above the ecliptic plane, and the darker portion is below the ecliptic plane. Likewise for the asteroid/comet orbit, the light blue indicates the portion above the ecliptic plane, and the dark blue the portion below the ecliptic plane.

Orbit Viewer applet originally written and kindly provided by Osamu Ajiki (AstroArts), and further modified by Ron Bannke (JPL).

### 145545 Wensaying

**Discovered 2006 May 22 by Q.-z. Ye and T.-C. Yang at Lulin Observatory.**

Sayling Wen (1948-2003), a tireless educator and promoter for social work, was instrumental in establishing computer networks for "e-learning" at schools in many villages in Taiwan, China and Asia. His humanitarian spirit has also helped shape university education in Asia.
